## About Me

Computer Science and Applied Statistics graduate who is eager to learn and gain industry level experience looking for an opportunity to prove myself in the working world.

## Skills

### Programming

- Python (Flask, FastAPI)
- Java
- JavaScript (React)
- R
- HTML
- CSS

### Databases and Dev Tools

- MySQL
- MongoDB
- Bash / Git / Docker
- Firebase

### Statistics (R)

- PCA & Factor Analysis
- Time Series
- Regression
- Multidimensional Analysis

### Other

- Adobe Premiere Pro
- Adobe Photoshop
- Markdown
- LaTex

## Education

### Full Stack Web Developer Bootcamp

Jan 2026 – Present

Zaio Institute of Technology

Full Stack Web Development using HTML, CSS, JavaScript (React, Node), Firebase.

### BSc Computer Science and Applied Statistics

Feb 2023 – Present

University of Cape Town

Computer Science: Data Structures, Databases, Parallel and Concurrent Computing, Computer Architecture, Networks.

Applied Statistics: Applied Multivariate Data Analysis, Statistical Theory.

### NSC (National Senior Certificate)

2018 – 2022

Rylands High School

Mathematics 73% • Physical Sciences 73% • Life Sciences 74%

Accounting 83% • Geography 88% • English HL 84%

Afrikaans FAL 83% • Life Orientation 88%

## Projects

### Urban Threads | Online Store

April 2026

Project

*HTML, CSS, JavaScript(React), Firebase*

A React based Online Store for a fictional clothing brand. Products are stored on a Firebase Firestore as the backend. [\[Available here\]](#)

### Google Keep Clone

April 2026

Project

*HTML, CSS, JavaScript(React)*

A React clone of Google Keep displaying the use of local storage for note storage. [\[Available here\]](#)

## Experience

### Junior Developer

Aug 2026

Addmore Digital

*NodeJS, TypeScript, MySQL*

Full Stack Web Development. Developing Next Run, the digital platform for the future of South African Basketball.

### Systems Architect and Backend Developer

Aug 2025 – Oct 2025

University Project

*Python (FastAPI), JavaScript (React), MongoDB*

Systems Architect and Backend Developer for a Dockerized FastAPI-React-MongoDB Inventory Management System (BabyBargainsIMS). Designed a four-layer distributed architecture (Presentation, Service, API, Data) for scalability and fault tolerance. Implemented backend APIs, business logic, scheduled services, and database architecture. Led Docker setup, deployment configuration, and system integration. Enabled modular “plug-in” interfaces connecting to a shared API for future system expansion. [\[GitHub\]](#)

### IT Intern

Dec 2024

Advanced Integrated IT Labs

Observed the work day of an IT technician. Performed system scans and maintenance on workstations.
